

BIRMINGHAM MUSEUMS AND ART GALLERY

Birmingham Ornithology Collections

Part 2 - The W R Lysaght Collection of Birds

Phil Watson

Introduction

William Royse Lysaght C.B.E. was born in 1858 and died in 1945. His collection was essentially that of E.M. Connop of Wroxham, near Norwich. Lysaght acquired this in 1912 or 1913. It was housed at Castleford Museum in Chepstow and was presented to Birmingham Museum and Art Gallery by Mr. Desmond Lysaght in memory of his father. Lysaght ran the family business, John Lysaght Ltd, which made galvanised steel sheets and other steel products. The original works were in Wolverhampton but subsequently factories were opened in Newport, Bristol and Australia. The company was taken over in 1920 by GKN to which Lysaght was appointed as a director.

The collection was acquired by Birmingham in 1954 during the time when a new Natural History display was being developed in the branch museum at Cannon Hill Park. However, a letter on file indicates that not all of the collection was accepted by Birmingham and that *“a selection of material must be made to ensure representation of each species, important varieties and records”* and that this would be *“limited by the as yet unknown amount of reserve storage space”*.

Although originally cased many (probably the majority of) specimens were removed from these at Chepstow: *“In order to get the cases into the limited workspace here, it seems desirable that some preliminary dismantling should be done in Chepstow. I would therefore like to strip out and repack a fair number of specimens before sending them northwards”*.

In 1955 Birmingham was approached about the specimens which had been left behind as Castleford was *“sold again – this time to the Atco Motor Mower Company and the new owners are not interested in the remainder of the Museum collection.”* However, the reply was that Birmingham had *“removed everything for which we could find good storage”* and the offer of the balance of the collection was declined. The ultimate fate of these remaining specimens is unknown.

The printed catalogue of the collection [*The Natural History Collection at Castleford, Chepstow, of Mr. W.R. Lysaght*, printed by Mullock & Sons Ltd. of Chepstow in September 1913] lists some 680 cases or individual specimens of which Birmingham acquired over 400. These amounted to a total of 1,860 birds of which Birmingham acquired nearly 1300. Of the three large private collections acquired by Birmingham (Auden, Chase and Lysaght) this was originally both the biggest and the richest with some 325 species represented, though admittedly not all of these were British. The original catalogue lists some fourteen taxidermists, eleven of whom are represented in the part of the collection acquired by Birmingham, although the majority of specimens were mounted by Cole, Pashley and Saunders.

Provenance

Provenances of the specimens of the Lysaght (Connop) collection are given in the tables below. In order to facilitate comparison with the other two large private collections in Birmingham, and for those interested in the history of collections, the tables include all the specimens previously in the collection, not just those which came to Birmingham, based on the published Castleford catalogue mentioned above.

England		St Kilda	3	Holland	4
Cambs	3	Shetland	1	Italy	1
Gloucs	1	“Scotland”	16	Lapland	1
Herts	4	Wales		Morocco	1
Kent	2	Tenby	1	New Zealand	2

Lincs	2	Ireland		North Sea	1
Norfolk	1360	Waterford	4	Norway	1
Rutland	1	Foreign		Palestine	2
Suffolk	22	Austria	1	Russia	6
Surrey	1	Burkowna	2	South America	4
Sussex	8	China	1	S. Victoria Land	2
Yorks	5	Egypt	3	Switzerland	3
Leadenhall mkt	26	Falklands	1	USA	13
“England”	6	France	12		
Scotland		Germany	4	No provenance	311
Argyll	1	Greenland	3		
Orkney	10	Heligoland	4		

It is well known that Connop was a local, Norfolk collector but despite this the bias towards specimens from that county is quite staggering at some 73% of the whole collection. Furthermore it is quite likely that a fair number of the 310 specimens (17%) which are given no provenance also came from that county. The final 10% of the collection includes specimens from the rest of the British Isles and the rest of the world (almost half of them). Many of the latter were probably later additions to the collection by Lysaght himself. The concentration on Norfolk provenances seems to have largely spared Connop from the so-called Hastings Rarities scandal and only two specimens (the two examples of Black Larks in the collection, HR302 and 303) can definitely be attributed to this affair.

Of the 1,360 specimens from Norfolk some 785 have a more detailed provenance and the following table shows the extent and numerical breakdown of Connop’s collecting across Norfolk. The high numbers respectively from Breydon, Cley, Blakeney, Yarmouth and Hickling hardly need comment.

Barton	1	Gorleston	2	Morston	5
Barton Broad	1	Great Yarmouth	85	Neatishead	3
Billingford	2	Halvergate	2	North Wootton	1

Frettenham	1	Morley	1	Norfolk, no exact prov	575
Glandford	1	Morningthorpe	2		

Date of Specimens

Over a thousand specimens (57%) have the date of collection in the field recorded for them. There are several early specimens, the majority of which were probably acquired from other earlier collections. The bulk of the dated specimens (75%) fall in the period 1876 to 1895 and this was clearly his most active period of collecting both in terms of buying specimens from dealers and collecting them himself – Connop is recorded as shooting birds himself between 1880 and 1894. However he clearly continued to add to the collection until the very end with an average of about ten specimens a year for the last eighteen years though some of the very latest specimens may well have been added by Lysaght rather than being part of the original Connop collection (e.g. at least one of the penguins).

1830	1	1856	1	1872	1	1886	40	1900	14
1832	2	1857	2	1873	4	1887	48	1901	11

Associations

The catalogue of the Lysaght collection records the names of many individuals, primarily taxidermists and/or suppliers, previous collectors and gunners. In the list which follows the nature

of the association is given in brackets; where this is unknown it is indicated with a question mark. Known taxidermists are marked with * and previous collectors with +.

+Ashby, Richard, Egham, Surrey (ex collection of sold 06.12.1897)
+Babington, Rev. Dr. Churchill, Cockfield Rectory, Suffolk, (ex collection of sold on 12.04.1889)
+Banham, B., Belton, Suffolk (shot by and ex collection, sold 29.09.1893)
+Barker, George, Holt, Norfolk, (ex collection of sold on 15.05.1873)
Beauchamp (brought from Egypt by)
+Bidwell, Edward (ex collection of)
Bilck, M.C. (from)
+Buller (ex collection of)
Bullock (bought at his sale)
*Bunn, Howard, Lowestoft (taxidermist)
Burton, John, a boy of 14 years age (shot by)
Catling (shot by)
*Clarke, Robert, Snettisham (taxidermist)
*Cole, J.A., Norwich (taxidermist)
Connop, E.M. (shot by)
Connop, Geoffrey (shot by)
+Doubleday, Henry, Epping, Essex (ex collection of sold 23.08.1871)
Ensor, Major (shot by)
Feilden, Colonel Henry Wemyss, West House, Wells, Norfolk (taken by)
Fontaine, Edward, Easton, Norfolk (bred in his aviary)
+Frere, Rev. H.T., Burston Rectory, Norfolk (ex collection of sold 12.03.1891)
*Gätke, Heinrich (set up by)
Gibbs, Great Yarmouth (shot by)
Glasse, W.B., Q.C., Vere Lodge, Raynham, near Fakenham (shot by)
+Glasspoole, Captain Richard, Norwich (ex collection of sold in 1846)
*Griffin, Cambridge (from, taxidermist?)
+Gurney, J.H., Keswick Hall, Norwich (ex collection of sold on 08.07.1890)
Holman, Cley (shot by)
Hudson, G., junior (shot by)
Hudson, T.M., junior (shot by)
Jamrach, A.E. (bought from by Pashley)
+Jary, Miss, Burlingham House, Norfolk, (ex collection of sold 19.09.1892)
Leeds, F., Esq., Castle Acre, Norfolk (shot by)
Long, George, of Blakeney (shot by)
*Lowne, W., Great Yarmouth (taxidermist)
+Master, Alfred, Norwich (ex collection of sold 17.06.1886)
Masters, G. (shot by)
+Micklethwaite, Rev. S.N., Hickling, Norfolk (ex collection of, sold 21.06.1889)
Nudd, Alfred, Hickling (shot by)
+Overend, J.G., Great Yarmouth (ex collection of, sold 16.06.1876)
+Owles, Great Yarmouth (ex collection of)
*Pashley, H.N., Cley (taxidermist)
+Pears (ex collection of)
Pinchen, R., Cley (shot by)
Platten, gamekeeper to Thomas Rising (shot by)
Potts, E.M. (shot by)
+Preston (ex collection of)
Preston (shot by)

*Pycraft, W., Great Yarmouth (taxidermist)
 Ramm, Edward, Cley (shot by)
 Ringer, James, Swaffham (shot by)
 +Rising, Robert, Horsey Hall, Norfolk, (ex collection of sold 17.09.1885)
 Rising, Thomas, his gamekeeper (Platten, shot by)
 *Saunders, E.C., Great Yarmouth (taxidermist)
 Saunders, Howard (given to Connop by)
 *Sayer, John, Norwich (taxidermist)
 +Silcock, B.C. (ex collection of)
 *Smith, George, Great Yarmouth (taxidermist)
 +Spelmann, W.W., Brundall, Norfolk (ex collection of)
 +Stevenson, Henry, Scoulton, Norfolk (ex collection of sold 12.09.1887 and 21.03.1889)
 Thomas, John, Great Yarmouth (shot by)
 +Tomkins (ex collection of)
 Turner, E. (shot by)
 Williamson, Heigham, Norfolk (shot by)
 Wrench, T. (shot by)

The Checklist

The checklist which follows only includes the specimens which came to Birmingham and contains all the information given for them in the Castleford catalogue. It follows the current British List for ease of reference rather than the original catalogue order, with species not represented on the list inserted under the appropriate family. Some foreign specimens are listed at the end. The columns are arranged in the following order:

1. Birmingham accession number
 2. Lysaght's "original" number based on the Castleford catalogue
 3. details of sex, maturity and varieties. The following abbreviations have been used: m = male, f = female, dow = downie, imm = immature, juv = juvenile, nes = nestling (downies and nestlings are often mounted in groups and the number of specimens in a group is given as a figure after the abbreviation), alb =albino, pi = pied.
 4. date of collection (given in the format dd.mm.yyyy but where only the year is known this is given as 00.00.yyyy and where no exact day is known it is given as 00.mm.yyyy)
 5. county of origin
 6. detailed provenance where known
 7. notes which follow the main listing. These consist of annotations on individual specimens but in order to save space and repetition these have been edited into footnotes
- An x in any column denotes that the information is not available in the Castleford catalogue.

ORDER: Anseriformes

Family: Anatidae

Mute Swan (*Cygnus olor*)

1954Z1.224	392	x	x	Norfolk	Hickling
------------	-----	---	---	---------	----------

Tundra (Bewick's) Swan (*Cygnus columbianus*)

1954Z1.225	393	m	11.02.1879	Norfolk	Breydon Broad	1
