Version 1.0 February 2011
Introduction

The following is a result of a survey of non-local archaeological collections in West Midlands museums carried out by the West Midlands Archaeological Collections Research Unit. All museums in the counties of Herefordshire, Shropshire, Staffordshire, Warwickshire, West Midlands and Worcestershire were included in the survey, but not private collections or material currently under study at Field Units. One of the aims of the project was to make awareness of the collections more widely known, especially artefacts of non-local origin which researchers may not think to look for in West Midlands’ museums. Thus the survey does not include material from the counties of Herefordshire, Shropshire, Staffordshire, Warwickshire, Worcestershire or West Midlands themselves. An initial attempt to disseminate the results by means of short articles in relevant county journals faltered for various reasons and so it has now been decided to make the results available on-line. Material previously published in county journals is also included here for the sake of completeness. It should be emphasised that this is not a catalogue *per se* but rather a finding aid to allow researchers to determine if there is any material likely to be relevant to their current project in West Midlands museums. Also, it is based on museum catalogue records and annotations on the objects themselves and it is possible that where there have been changes to county boundaries there may be some inconsistency. Users are therefore advised to check under both county names if they are aware of boundary changes for their particular study area.

Material from the following counties is included:

Bedfordshire, Berkshire, Buckinghamshire, Cambridgeshire, Cornwall, Cumbria, Derbyshire, Devon, Dorset, Essex, Gloucestershire, Greater London, Hampshire, Hertfordshire, Isle of Wight, Kent, Leicestershire, Lincolnshire, Norfolk, Northamptonshire, Northumberland, Nottinghamshire, Oxfordshire, Somerset, Suffolk, Surrey, Sussex, Wiltshire and Yorkshire. Counties highlighted in bold have also been published in the county journal. These are all listed in the bibliography below but references are only given for pieces which were illustrated.

The list is laid out alphabetically by county and by site within each county. A running number, or sequence of numbers, has been assigned to each entry for ease of reference though these relate to the number of museum accession numbers in each entry rather than the total number of objects. Each entry contains a brief description, in some cases including dimensions (always in mm.), the museum accession number(s) and any relevant bibliography.

The following abbreviations have been used when citing museum accession numbers:

Avon = Avoncroft Museum
Bir = Birmingham City Museums and Art Gallery
Cov = Coventry, Herbert Art Gallery and Museum
Her = Hereford City Museum and Art Gallery
Kee = University of Keele, Geology Department
Lap = Birmingham University, School of Earth Sciences, Lapworth Museum
